

Bigyan Ghimire

AI Engineer | Multi-Agent Systems | Full-Stack AI | EdTech Founder

Akagg07@proton.me | Nepal | [GitHub](#) | [LinkedIn](#)

PROFILE

Computer Engineering undergraduate (University of Sunderland) with hands-on experience building production-grade AI systems, multi-agent orchestration pipelines, and full-stack AI applications.

EDUCATION

B.Sc. Computer Architecture & Systems Engineering — University of Sunderland Nov 2024 – Present

Relevant Skills: Bot Development, Web3, Generative AI, Blockchain

+2 Science (Biology) — Shikshadeep College, Biratnagar Aug 2020 – Aug 2021

Grade: 12 | Mahatma Gandhi Scholarship, Indian Embassy (2019–2021)

PROJECTS & STARTUPS

Nurvexa Labs — Founder 2025 – Present

nurvexalabs.com

- RAG-powered nursing exam preparation platform targeting the PCL Nursing licensing exam in Nepal.
- Built adaptive question generation and personalized study plans powered by large language models.
- Developed the full AI engine including retrieval pipeline, content ingestion, and evaluation framework.

AFI — Market Event Intelligence Platform (TinyFish Accelerator) 2025 – Present

github.com/bigyangg/tinyfishafi

- Built a real-time SEC EDGAR monitoring platform that detects multi-form filings (8-K, 10-K, 10-Q, S-1, Form 4, SC 13D, DEF 14A) with dynamic poll intervals (45–300s by market hour).
- Architected a 9-agent concurrent enrichment pipeline (`asyncio.gather`) including social sentiment, insider transactions, congressional trading, options activity, genome pattern analysis, and TinyFish-powered Yahoo Finance market context extraction.

AETHER-LOGOS — Multi-Agent Orchestration System 2025

github.com/lucaz719/AETHER-LOGOS (collaborator)

- Collaborated on a multi-agent orchestration framework exploring autonomous agent coordination, task delegation, and inter-agent communication protocols.
- Contributed to agent architecture design and integration of LLM-driven decision-making layers.

Voicefly — Voice Automation Agent 2025

github.com/bigyangg/voicefly

- Building a custom voice model covering both TTS (text-to-speech) and STT (speech-to-text), trained and optimized for low-latency inference.
- Designing a scalable API infrastructure layer enabling developers and businesses to integrate Voicefly's TTS/STT capabilities into their own products positioning Voicefly as a voice-as-a-service platform.

Prediction Market — Decentralized Web3 Application 2025

github.com/bigyangg/prediction-market

- Developed a decentralized prediction market platform on blockchain, enabling permissionless event-based wagering using smart contracts (JavaScript/Solidity).

WhatsApp Automation Bot 2024

github.com/bigyangg/whstapp-automation07

- Built an end-to-end WhatsApp bot for automated messaging workflows, event triggers, and user interaction pipelines using Node.js.

TECHNICAL SKILLS

Languages & AI/ML: Python, JavaScript; FastAPI, React, Node.js; LangChain, multi-agent orchestration, RAG pipelines, Gemini/OpenAI SDKs, ANN/Keras

Infrastructure & Deployment: PostgreSQL + Realtime, Docker, REST APIs, SSE, Telegram Bot API, Resend, Git

Web3 & Blockchain: Solidity, smart contracts, decentralized application development

Other: OSINT, Claude Code multi-agent workflows, bot development, voice automation

CERTIFICATIONS

Open-Source Intelligence (OSINT) — Udemy, May 2024 | Credential: UC-c7196615-aa8f-4c81-ae76-89425f8327bb

Artificial Neural Networks (ANN) with Keras in Python and R — Udemy, Jun 2024 | Credential: UC-6bf9d8e1-0fcf-46ac-ad27-7b3e76cbe30d

ACHIEVEMENTS & LEADERSHIP

- Selected for TinyFish Accelerator Program — built AFI as a showcase project demonstrating advanced multi-agent orchestration and real-time AI pipelines.
- Founded NurvexaLabs (2025), an AI-EduTech startup targeting Nepal's nursing licensing exam market with RAG-powered adaptive learning.
- Active contributor to 15+ repositories spanning AI agents, Web3, voice automation, and market intelligence systems.
